USF CONNECT Welcomes BioLaminex, Inc. to Tampa Bay Technology Incubator

October 16, 2009

USF CONNECT is pleased to announce the recruitment of BioLaminex, Inc. to the Tampa Bay Technology Incubator. Previously located in New Haven, Connecticut, the Firm moved its headquarters and product R&D operation to the Tampa Bay Technology Incubator following the recruitment of Dr. Chun-Min Lo as Chief Scientific Officer.

BioLaminex designs and develops polypeptide-based nanocoatings and nanofibrils for applications in biotechnology and medicine. Sources of funding for current technology development include a Small Business Innovation Research award from National Institutes of Health under the Bioengineering Nanotechnology Initiative. The Company has formed a strategic partnership with Dr. Don Haynie at USF and secured a substantial commitment of cash from Florida High Tech Corridor Matching Grant program for additional support from the NIH.

BioLaminex joins nearly twenty other companies currently located at the Tampa Bay Technology Incubator. For more information regarding USF CONNECT or BioLaminex, Inc., please visit www.usfconnect.org, or see www.biolaminex.com or phone 813-974-9153.
