

# USF CONNECT

## USF Technologies Exhibit at ResearchOne Kick-Off

For Release: November 4, 2008:

On Monday, November 3<sup>rd</sup>, the University of South Florida Office of Research & Innovation kicked-off a week long celebration of USF research and technologies. More than 25 exhibitors took part in the event including companies with technologies stemming from the Tampa Bay Technology Incubator as well as companies receiving matching funds from the [Florida High Tech Corridor](#) for projects conducted in partnership with USF faculty and students.

[Masscal Corporation](#) of Orlando received matching funds for its project "Development of a Nanoscale Sensor for Quantitative Heat and Mass Measurements in Liquids." The project was in collaboration with Dr. Venkat Bhethanabotla of the USF Chemical Engineering department.

[AMJ Environmental, Inc.](#) of St. Petersburg has recently been awarded matching funds for its project "Study of Unmanned Surface Vehicles for Environmental Monitoring of Natural and Manmade waterways in the State of Florida." The project is in collaboration with Dr. Eric Steimle of the USF St. Petersburg Environmental Science & Policy department.

[Natura Therapeutics, Inc.](#), located in the Tampa Bay Technology Incubator, has recently been awarded matching funds for its project "Oral Administration of TeaMem inhibits Alzheimer's Disease Pathogenesis." The project is in collaboration with Dr. Jun Tan of the USF department of Psychiatry.

Other companies exhibiting included several Tampa Bay Technology Incubator client companies: [BioMedImmunotech, Inc.](#), [Document Advantage Corporation](#), [EMS, Inc.](#), [Radiance Technologies, Inc.](#) and [Rehab Ideas, Inc.](#)

These exhibitors are great examples of the companies and technologies being aided by the USF CONNECT program. The Tampa Bay Technology Incubator currently houses about twenty start-up companies conducting biotech research and development in USF's Research Park.
