USF CONNECT Welcomes StemCell Lab Corporation

December 15, 2009

USF CONNECT has successfully recruited StemCell Lab Corporation to the Tampa Bay Technology Incubator. The company was founded by Calvin Cao, following the merger of his previous company, Stem Cell Therapy International, Inc. with HistoStem, Inc., the largest cryobank in South Korea.

StemCell Lab Corp. is a client-based cell therapy services company that supports the development of cellular therapies by providing cell manufacturing and consulting services that address regulatory, financial, technical, process and quality systems strategies.

“The incubator has provided our company with the opportunity to work closely with USF faculty and students”, said Calvin Cao, President of Stem Cell Lab Corporation.

StemCell Lab Corp. joins twenty other companies currently located at the Tampa Bay Technology Incubator. For more information regarding StemCell Lab Corp. and USF CONNECT please visit www.stemcelllabcorp.com and www.usfconnect.org.
